1. PURPOSE

This report provides the third compliance report required under *the Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) approval (EPBC 2020/8759), Condition 37, for the period between 10 May 2024 and 9 May 2025. This report has been prepared in accordance with the Annual Compliance Report Guidelines, Commonwealth of Australia 2014 (henceforth referred to as the Annual Compliance Report Guidelines) and includes:

- Project details as specified (Section 2 and Table 1).
- A description of works completed during the reporting period (Section 3).
- An assessment of compliance against conditions imposed by EPBC 2020/8759 and attachments (Table 2).
- A declaration of accuracy signed off by the Project Manager (Section 5)

2. PROJECT DETAILS

The Overhead Transmission Line (OHTL) MacIntyre Wind Energy Precinct (EPBC ref: 2020/8759) will connect the MacIntyre Wind Farm (EPBC ref: 2020/8756) to the national electricity grid. The project includes 64km of high-voltage (330 kV) OHTL and ancillary infrastructure including:

- Two switching stations, namely MacIntyre switching station and Tummaville switching station
- Access tracks
- Firebreaks
- Site amenities
- Laydown areas.

The Project was deemed a controlled action under EPBC Act on 24 September 2020. The Project was assessed by preliminary documentation and subsequently approved with conditions by the Department of Climate Change, Energy, the Environment and Water (DCCEEW) on 22 February 2022. Commencement of the action in accordance with the EPBC Act approval occurred on 10 May 2022.

Table 1: Project details

| | |
|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| EPBC Reference | 2020/8759 |
| Project Name | Overhead Transmission Line MacIntyre Wind Energy Precinct, 40km west of Warwick, Queensland |
| Approval holder | Ark Energy MacIntyre Pty Ltd ACN 642 467 810; and Macintyre Wind Farm Pty Ltd ACN 636 797 745. |
| Approved Action | To construct an overhead transmission line and associated ancillary works for the proposed MacIntyre Wind Farm Project, 40 km west of Warwick, Queensland [See EPBC Act referral 2020/8756]. |
| Person accepting responsibility for the report | Ben Ortiz, Project Manager |
| Reporting period of the report | 10 May 2024 to 9 May 2025 |
| Date of preparation of the report | 22 July 2025 |

3. DESCRIPTION OF ACTIVITIES

The action has completed the construction phase comprising of vegetation clearing, civil works, construction of infrastructure and associated electrical works and is considered to be within the operations and maintenance phase. The project is overseen by the approval holder, with construction, operation and maintenance works to be undertaken by Powerlink. Such works included all civil and vegetation clearing works associated with the action, to which the bulk of construction related environmental aspects relate. Specifically, the extent of work for this reporting period includes rehabilitation work, including:

- General rehabilitation related to rutting, drainage, whoa boys, minor gate and fence repairs etc.
- Installation of permanent whoa boys where required.
- Carting and spreading of mulch.
- Re-work on mega mulch areas.
- Seeding and fertilizing was undertaken on all batters progressively through the project.

The approval holder has had an ongoing commitment to supporting its local communities by investing in providing local employment opportunities, using local suppliers and delivering a robust community program that supports local initiatives to build community resilience. Key highlights include:

- A total value of \$854M was awarded to businesses with a Queensland presence through construction to date.
- \$225M of the total value was awarded to businesses with a regional QLD presence
- 275 businesses which worked on the project with a Queensland presence were new to the supply chain
- \$500K invested to ensure public access to a new 4G Telstra tower to help remove mobile phone blackspots in the region.
- 40% of hours worked on site have been done by a local workforce and 6% by Aboriginal or Torres Strait Islander people
- \$250K legacy fund investment commitment to construct Inglewood Sports Complex's new gym and storage
- \$210 legacy fund investment commitment to upgrade community halls throughout the region to build them into community resilience centers.

- A close out of the partnership with Queensland Farmers Federation to deliver the Energy Southern Queensland (EnergySQ) program which was an on-farm energy efficiency program that will help landholder understand and manage their onfarm energy consumption, and identify ways to reduce your energy spend and carbon footprint.
- 3 new scholarships awarded through the University of Southern Queensland
- Re-establishment of the Community Engagement Committee
- \$372 000 invested to date into local community groups through the small grants program with an ongoing commitment of \$110,000 per year

4. COMPLIANCE ASSESSMENT

This compliance assessment has been developed to address requirements set out in Section 3.6 of the *Annual Compliance Report Guidelines*. Results of this assessment are provided in Table 2. Compliance designations applied for the assessment are as per Section 3.7 of the aforementioned standard, and are reproduced below:

1. Compliant: 'Compliance' is achieved when all the requirements of a condition have been met, including the implementation of management plans or other measures required by those conditions.
2. Non-compliant: A designation of 'non-compliance' should be given where the requirements of a condition or elements of a condition, including the implementation of management plans and other measures, have not been met.
3. Not applicable: A designation of 'not applicable' should be given where the requirements of a condition or elements of a condition fall outside of the scope of the current reporting period. For example, a condition which applies to an activity that has not yet commenced.

Table 2: Compliance Assessment

| Condition | | Compliance Designation | Evidence / Comments | | | | | | | | | | | | | | |
|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|-----------------------|-------|--------|------------------------|--------|----------------|------|-----------------|-------|----------------------------|------|-------------------|------|
| Part A – Conditions Specific to the action | | | | | | | | | | | | | | | | | |
| 1 | Within the project area, the approval holder must not clear more than: <div><div>a.</div>236.51 ha of Koala habitat; <div>b.</div>236.51 ha of Grey-headed Flying-fox habitat; <div>c.</div>88.9 ha of Greater Glider habitat; <div>d.</div>126.65 of Squatter Pigeon habitat; <div>e.</div>4.93 ha of <i>Macrozamia conferta</i> habitat; and <div>f.</div>4.67 ha of Regent Honeyeater habitat.</div> | Compliant | Spatial analysis was undertaken on high resolution imagery taken during LiDAR capture to determine the final disturbance footprint. Based on the findings, all clearance was within the stipulated thresholds: <table><tr><th>MNES Species Habitat</th><th>Actual Clearance (ha)</th></tr><tr><td>Koala</td><td>175.75</td></tr><tr><td>Grey-headed Flying-fox</td><td>175.34</td></tr><tr><td>Greater Glider</td><td>71.8</td></tr><tr><td>Squatter Pigeon</td><td>99.11</td></tr><tr><td><i>Macrozamia conferta</i></td><td>3.52</td></tr><tr><td>Regent Honeyeater</td><td>3.98</td></tr></table> | MNES Species Habitat | Actual Clearance (ha) | Koala | 175.75 | Grey-headed Flying-fox | 175.34 | Greater Glider | 71.8 | Squatter Pigeon | 99.11 | <i>Macrozamia conferta</i> | 3.52 | Regent Honeyeater | 3.98 |
| MNES Species Habitat | Actual Clearance (ha) | | | | | | | | | | | | | | | | |
| Koala | 175.75 | | | | | | | | | | | | | | | | |
| Grey-headed Flying-fox | 175.34 | | | | | | | | | | | | | | | | |
| Greater Glider | 71.8 | | | | | | | | | | | | | | | | |
| Squatter Pigeon | 99.11 | | | | | | | | | | | | | | | | |
| <i>Macrozamia conferta</i> | 3.52 | | | | | | | | | | | | | | | | |
| Regent Honeyeater | 3.98 | | | | | | | | | | | | | | | | |
| 2 | The approval holder must not clear outside the project area. | Not applicable | <div><div>▪</div>No clearing occurred during the reporting period.</div> | | | | | | | | | | | | | | |
| Environmental offsets | | | | | | | | | | | | | | | | | |
| 3 | To compensate for the total clearance of habitat for EPBC Act listed threatened species not including <i>Macrozamia conferta</i> habitat up to the limits as specified in condition 1, the approval holder must provide an environmental offset in accordance with the principles of the Environmental Offsets Policy to the satisfaction of the Minister. | Compliant | Environmental offsets delivery is progressing as described below. | | | | | | | | | | | | | | |
| 4 | The approval holder must implement the Interim Offset Area Management Plan (IOAMP) upon the commencement of the action and until the Minister has approved an Offset Area Management Plan (OAMP). | Compliant | <div><div>▪</div>The IOAMP was developed prior to EPBC Act approval and has been implemented from commencement of the action. <div>▪</div>Studies to support the development of the OAMP to be undertaken in accordance with the IOAMP. As such, offset calculations and habitat quality scoring have been completed and presented in the draft OAMP submitted to DCCEEW for review (in accordance with requirements of Condition 5 below).</div> | | | | | | | | | | | | | | |
| 5 | The approval holder must submit an OAMP prepared by a Suitably Qualified Ecologist to the department three months after the commencement of the action for the written approval of the Minister. The approval holder must not commission until the OAMP has been approved in writing by the Minister. The approval holder must implement the approved OAMP. | Compliant | <div><div>▪</div>The draft OAMP was submitted to DCCEEW via email dated 07.07.2022, which is 3 months from the commencement of the action (07.04.2022). <div>▪</div>The draft OAMP was prepared by a Suitably Qualified Ecologist as demonstrated in section 15 of the draft OAMP. <div>▪</div>The OAMP was approved by DCCEEW on 2 July 2024.</div> | | | | | | | | | | | | | | |
| 6 | The OAMP must include: | Compliant | <div><div>▪</div>Each of these items have been addressed in the OAMP.</div> | | | | | | | | | | | | | | |

| Condition | Compliance Designation | Evidence / Comments |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|-----------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> a. a summary of the residual impacts to protected matters that will be compensated for by the offset. This summary must include the area(s) of habitat for protected matters and its condition and quality at all impact sites which the particular offset is to address; a. a table of commitments made in the OAMP to achieve the ecological benefits for relevant protected matters, and a reference to where the commitments are detailed in the OAMP; b. a description of the offset site(s), including location, size, condition, environmental values present and surrounding land uses; c. baseline data, including results from field validation surveys, and quantifiable ecological data on site habitat quality, and other supporting evidence, that documents: <ul style="list-style-type: none"> i. that suitable habitat for each EPBC Act listed threatened species will be present within the offset site(s); ii. the quality and condition of habitat for each EPBC Act listed threatened species within the offset site(s); iii. the presence of Koala individuals within the offset site(s); iv. the presence of Greater Glider within the offset site(s) or within the home-range of Greater Glider in adjacent, connected Greater Glider habitat; and v. the nature and extent of any weeds and feral animals at the offset site(s). d. an assessment of site habitat quality for each habitat feature; e. details of how the offset site(s) will provide connectivity with habitat features outside the offset site/s and biodiversity corridors for each EPBC Act listed threatened species; | | <ul style="list-style-type: none"> ▪ The OAMP was approved by DCCEEW on 2 July 2024. |

| Condition | Compliance Designation | Evidence / Comments |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|---------------------|
| <ul style="list-style-type: none"> f. maps and shapefiles that clearly define the location and boundaries of the offset site(s), accompanied by offset attributes; g. specific offset completion criteria derived from the site habitat quality scores to demonstrate the improvement in the quality of habitat for each EPBC Act listed threatened species within the offset site(s) over the period of effect of this approval to the satisfaction of the Minister; h. details of the management actions, and timeframes for implementation, to be undertaken to achieve the offset completion criteria, including but not limited to; <ul style="list-style-type: none"> i. control of grazing stock within the offset site(s); vi. control of grazing within riparian zones of the offset site(s); vii. establishment of the typical range of tree species native to the Nandewar Bioregion, in particular local Eucalyptus species; viii. measures to protect juvenile trees from grazing by native and invasive species; ix. weed and feral animal management; and x. a commitment to maintain or improve the key habitat features within the offset sites(s) for the duration of the approval. i. interim milestones that set targets at 5-yearly intervals for progress towards achieving the offset completion criteria; j. details of the nature, timing and frequency of monitoring to report progress against achieving the 5-yearly interim milestones and maintaining improvements of site habitat quality. The frequency of monitoring must be sufficient to track progress towards each set of milestones, and sufficient to determine whether the environmental offset is likely to | | |

| Condition | | Compliance Designation | Evidence / Comments |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | <p>achieve those milestones in adequate time to implement all necessary corrective actions;</p> <p>k. timing for the submission of interim monitoring reports which provide evidence demonstrating whether the interim milestones and offset completion criteria are likely to be achieved and subsequently have been achieved;</p> <p>l. timing for the implementation of corrective actions if monitoring activities indicate the interim milestones are unlikely to be, or have not been, achieved;</p> <p>m. a risk analysis and a risk management and mitigation strategy for all risks to the successful implementation of the OAMP and timely achievement of the offset completion criteria, including a rating of all initial and post-mitigation residual risks in accordance with the risk assessment matrix;</p> <p>n. evidence of how the management actions and corrective actions take into account relevant approved conservation advices and are consistent with relevant recovery plans and threat abatement plans and where applicable, other relevant documents; and</p> <p>o. details of the legal mechanism for securing the environmental offset, such that legal security remains in force over the offset site(s) for at least the period of effect of this approval.</p> | | |
| 7 | The approval holder must secure the offset site(s) specified in the approved OAMP within 12 months of the date that the OAMP is approved in writing by the Minister. The approved OAMP must be attached to the legal mechanism used to secure the environmental offset. | Non-compliant | The OAMP was approved by DCCEEW on 2 July 2024. The legally binding mechanism for the offset is a Voluntary Declaration under Queensland's <i>Vegetation Management Act 1999</i> assessed by the Queensland Department of Natural Resources and Mines, Manufacturing and Regional and Rural Development (DNRMMRRD). The Voluntary Declaration application was lodged on 12 June 2025. At the time of writing, DNRMMRRD have not approved the Voluntary Declaration. The approval holder has received formal correspondence from DNRMMRRD acknowledging the receipt of the application and commencement of the |

| Condition | | Compliance Designation | Evidence / Comments |
|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| | | | assessment. A self reported non-compliance was issued to DCCEEW on 2 July 2025 in accordance with condition 38 of this approval. |
| 8 | The offset completion criteria as specified in the approved OAMP must be achieved within 20 years of the commencement of the action and then be maintained or exceeded for the duration of the approval. The approval holder must regularly analyse the results of monitoring so as to be able to anticipate any likely failure to achieve the interim milestones and completion criteria and, so as to avoid such failure, promptly propose improved or additional management measures and/or offset site(s) in one or more revised versions of the OAMP and seek Minister approval of any such revised OAMP. | Not applicable | Requirement not triggered; the offset criteria timeframe has not elapsed. |
| 9 | <p>If the offset completion criteria specified in the approved OAMP are not met within 20 years of the commencement of the action, the approval holder must, within 10 business days of the 20th anniversary of the commencement of the action:</p> <ul style="list-style-type: none"> a. notify the department which offset completion criteria have not been met, by how much, and the likely cause(s) of the completion criteria not being met; and b. submit to the department within 4 months of the 20th anniversary of the commencement of the action a Supplementary Offset Area Management Plan (SOAMP) for the approval of the Minister. | Not applicable | Requirement not triggered; the offset criteria timeframe has not elapsed. |
| 10 | If required under condition 9, the SOAMP must detail the additional and revised management measures and/or offset site(s) that will be implemented and offset site(s) secured to compensate, to the satisfaction of the Minister, for the non-achievement of offset completion criteria specified in the approved OAMP. | Not applicable | Requirement not triggered; the offset criteria timeframe has not elapsed. |
| 11 | The approval holder must secure any offset site(s) specified in the approved SOAMP within 12 months of the date that the SOAMP is approved in writing by the Minister. The approved SOAMP must be | Not applicable | Requirement not triggered; no SOAMP has been approved. |

| Condition | | Compliance Designation | Evidence / Comments |
|------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | attached to the legal mechanism used to secure the offset site(s) specified in the approved SOAMP. | | |
| 12 | The approval holder must notify the department within 5 business days of the mechanism to secure each offset site having been executed. | Not applicable | Requirement not triggered; the offset mechanism is yet to be executed. |
| Matters of National Environmental Significance (MNES) Management Plan | | | |
| 13 | For the protection of the EPBC Act listed threatened species the approval holder must submit to the department a MNES Management Plan for the written approval of the Minister prior to commissioning. The MNES Management Plan must be prepared in accordance with the department's Environmental Management Plan Guidelines. The approval holder must not commence commissioning until the MNES Management Plan has been approved in writing by the Minister. The approval holder must implement the approved MNES Management Plan for the duration of the approval. | Compliant | <ul style="list-style-type: none"> The MMP was approved on 16 August 2024. |
| 14 | <p>The MNES Management Plan must ensure that impacts to EPBC Act listed threatened species do not exceed the clearance limits specified in condition 1 and that indirect impacts to EPBC Act listed threatened species are avoided and mitigated to the greatest possible extent, and include:</p> <ul style="list-style-type: none"> a. characterisation and estimation of the extent of all indirect impacts of the action, b. details of the measures (including habitat rehabilitation) that will be undertaken in the project area to avoid and mitigate impacts, including indirect impacts, on EPBC Act listed threatened species and their habitat during clearing, construction, operation and decommissioning, including but not limited to: <ul style="list-style-type: none"> i. the measures specified in Attachment H1 for the duration of construction; and | Compliant | <ul style="list-style-type: none"> Refer to response to Condition 1 MNES habitat clearance limits. The MMP addresses the listed items, a summary of how each of the listed items is addressed is provided in Table 2.1 of the approved MMP. |

| Condition | | Compliance Designation | Evidence / Comments |
|-----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | <ul style="list-style-type: none"> ii. the measures specified in Attachment H2 for the duration of the approval. c. details of the specific timing of implementation, frequency and duration of the measures to be implemented, including the measures specified in Attachments H1 and H2; d. specification of interim milestones and completion criteria for habitat rehabilitation, e. details of the nature, timing and frequency of monitoring to ensure that impacts to protected matters do not exceed the clearance limits and that interim milestones and completion criteria for habitat rehabilitation are likely to be achieved and subsequently are achieved; f. timing for the submission to the department of reports of monitoring outcomes; g. triggers and timing for the implementation of corrective actions if interim milestones and completion criteria are unlikely to be achieved; h. risk analysis and a risk management and mitigation strategy for all risks to the successful implementation of the MNES Management Plan, including a rating of all initial and post-mitigation residual risks in accordance with the risk assessment matrix; and i. evidence of how the measures and corrective actions take into account relevant approved conservation advices and are consistent with relevant recovery plans and threat abatement plans. | | |
| 15 | The measures detailed in Attachment H1 and Attachment H2 must be implemented from the commencement of the action. | Compliant | <ul style="list-style-type: none"> ▪ Attachment H1 is not applicable. The project is no longer under construction. ▪ Assessment provided against Attachment H2 within this table (see below). |
| Macrozamia conferta Translocation Management | | | |

| Condition | | Compliance Designation | Evidence / Comments |
|--------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 16 | For the protection of <i>Macrozamia conferta</i> individuals, the approval holder must, prior to the action having any impact to <i>Macrozamia conferta</i> , submit to the department, for the written approval of the Minister, a <i>Macrozamia conferta</i> Translocation Management Plan (MTMP). The MTMP must be prepared by a Suitably Qualified Field Ecologist. The approval holder must ensure that the action has no impact on any <i>Macrozamia conferta</i> individual until the MTMP has been approved by the Minister in writing. The approval holder must implement the MTMP approved by the Minister. | Compliant | <ul style="list-style-type: none"> The MTMP was prepared by a Suitably Qualified Field Ecologist, submitted and approved by DCCEEW on 13.05.2022, prior to the first <i>M. conferta</i> translocation recorded on 23.06.2022. |
| <i>Impact Site assessment</i> | | | |
| 17 | To determine the extent of the impacts to <i>Macrozamia conferta</i> within the Project Footprint prior to clearance of any <i>Macrozamia conferta</i> , the MTMP must include the findings of pre-clearance surveys for <i>Macrozamia conferta</i> undertaken across the entire Project Footprint to identify the number and size of <i>Macrozamia conferta</i> individuals that cannot be avoided by the action. | Compliant | <ul style="list-style-type: none"> The findings of pre-clearance surveys are provided in section 5.1 of the MTMP. |
| <i>Translocation site assessment</i> | | | |
| 18 | <p>The MTMP must include an assessment of a proposed <i>Macrozamia conferta</i> translocation site that:</p> <ol style="list-style-type: none"> includes a description of the translocation site, including location, size, condition, environmental values present and surrounding land uses; includes baseline data, including results from field validation surveys, and quantifiable ecological data on site habitat quality, and other supporting evidence, that documents the quality of habitat for <i>Macrozamia conferta</i> within the translocation recipient site; includes information about the numbers, age classes and density of any <i>Macrozamia conferta</i> individuals present in the translocation recipient site; | Compliant | <ul style="list-style-type: none"> Table 2.1 of the MTMP outlines how each of the items required by this condition are addressed by the plan. |

| Condition | | Compliance Designation | Evidence / Comments |
|---------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|---------------------------------------------------------------------------------------------------------------------|
| | <ul style="list-style-type: none"> d. evidence that the location of the translocation recipient site will enable maintenance of gene flow between <i>Macrozamia conferta</i> individuals translocated to the recipient site and other established <i>Macrozamia conferta</i> populations in the surrounding area; and e. includes information about the presence and abundance of suitable pollinator species for <i>Macrozamia conferta</i> both in and around the translocation recipient site | | |
| <i>Translocation of Macrozamia conferta</i> | | | |
| 19 | The MTMP must include a translocation program for <i>Macrozamia conferta</i> individuals that will be impacted by the action that produces, within 20 years of the commencement of the action, a long-term viable population that is equal to or greater than the original population of <i>M. conferta</i> impacted by the action and maintains or improves this outcome for the duration of the approval. | Compliant | <ul style="list-style-type: none"> ▪ Table 2.1 of the MTMP outlines how this condition has been met. |
| 20 | <p>The <i>Macrozamia conferta</i> translocation program must:</p> <ul style="list-style-type: none"> a. be in accordance with the Guidelines for translocation of threatened plants; b. specify the procedure for the translocation of <i>Macrozamia conferta</i> to areas outside of the impact areas suitable for their survival; c. be undertaken by a Suitably Qualified Field Ecologist; d. record the location of translocated <i>Macrozamia conferta</i> individuals; e. specify ongoing management procedures to enable the re-establishment of translocated <i>Macrozamia conferta</i> individuals, including adaptive management strategies to ensure potential risks and threats are managed; | | |

| Condition | | Compliance Designation | Evidence / Comments |
|-------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | <ul style="list-style-type: none"> f. specify ongoing management procedures to ensure the success of the <i>Macrozamia conferta</i> translocation program; g. specify the monitoring and record keeping processes of the translocation program to ensure easily replicable and consistent data collection; and h. specify translocation completion criteria for achieving no net loss of <i>Macrozamia conferta</i> impacted by the action over the period of effect of this approval. | | |
| <i>Propagation of Macrozamia conferta</i> | | | |
| 21 | The MTMP must commit to a program of propagation of seedlings to replace or exceed the number of <i>Macrozamia conferta</i> individuals impacted by the action that do not survive for at least twenty years after translocation. | Compliant | <ul style="list-style-type: none"> ▪ Proposed propagation and cultivation methods for seedlings to replace or exceed the number impacted are provided in section 9.3 of the MTMP. |
| 22 | <p>The program specified in the MTMP for propagating <i>Macrozamia conferta</i> individuals within the translocation recipient site must:</p> <ul style="list-style-type: none"> a. specify the minimum number of <i>Macrozamia conferta</i> that will be propagated or how the number will be determined to achieve the requirement of condition 21; b. specify the seed collection procedure for propagation and how this method will not impact adversely on the viability of the existing <i>Macrozamia conferta</i> population; c. specify the propagation procedure; d. specify ongoing management procedures for propagated <i>Macrozamia conferta</i> individuals; e. be able to record where <i>Macrozamia conferta</i> seedlings are planted within the translocation site; f. specify the monitoring and record keeping processes of the seedling propagation program to ensure easily replicable and consistent data collection; and | Compliant | <ul style="list-style-type: none"> ▪ Table 2.1 of the MTMP outlines how these conditions have been met. |

| Condition | | Compliance Designation | Evidence / Comments |

| | b. the approval holder must implement the action management plan specified by the Minister in the notice | | |
| 48 | At the time of giving the notice under condition 47, the Minister may also notify that for a specified period of time, condition 44 does not apply for one or more specified action management plans. | Not applicable. | <ul style="list-style-type: none"> Requirement not triggered; notice has not been given. |
| Note: conditions 44, 45, 46 and 47 are not intended to limit the operation of section 143A of the EPBC Act which allows the approval holder to submit a revised action management plan, at any time, to the Minister for approval. | | | |
| Completion of the action | | | |
| 49 | Within 30 days after the completion of the action, the approval holder must notify the department in writing and provide completion data. | Not applicable. | <ul style="list-style-type: none"> Requirement not triggered; action is not completed. |
| Attachment H2: Mitigation and management measures to be implemented for the duration of the approval | | | |
| 2.1 | A maximum speed limit of 60 km/hr must apply to all vehicles using access roads and tracks. | Compliant | <ul style="list-style-type: none"> Warning signs and associated speed limits observed as present in all Squatter Pigeon locations – 40km/h enforced. Powerlink enforce a 40 km/h limit on vehicles traveling on easement access tracks. |
| 2.2 | Vehicle access must be restricted to within the project footprint and existing access routes. | Compliant | <ul style="list-style-type: none"> Approved access shown on Environmental Work Plans. No known breaches reported. |
| 2.3 | Artificial site lighting must be kept to the minimum required for safety. Lighting beams must be directed downwards or use shields and baffles to limit light spill beyond the area that requires lighting. | Compliant | <ul style="list-style-type: none"> Requirements for artificial lighting are captured in the project VFMP. |
| 2.4 | Refuelling must not be undertaken within 50 metres of any waterway or retained habitat. | Compliant | <ul style="list-style-type: none"> Requirement covered in Contractor's procedures. No known breaches reported. |
| 2.5 | Storage of fuels, chemicals, wastes and other potentially environmentally hazardous substances must be bunded or otherwise contained in areas away from waterways and retained habitat. | Compliant | <ul style="list-style-type: none"> All chemical storage restricted to compound area. On site satellite laydown areas located on cleared easement and away from waterways and remnant habitat. Laydown areas used for waste and for building materials storage only. |
| 2.6 | The prevalence of weeds and feral animals identified as threats to the EPBC Act listed threatened species must be kept at less than the prevalence of weeds and feral animals prior to commencement of the action | Compliant | <ul style="list-style-type: none"> The stated weed and pest management measures are required by Project VFMP Weed and pest management is captured by Project environmental inspection checklists. Inspection records generated during the reporting period indicate general compliance with weed management requirements. |

| Condition | | Compliance Designation | Evidence / Comments |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | | | <ul style="list-style-type: none"> Information pertaining to invasive weeds is collected during pre-clearance surveys. Pre-clearance survey reports provide maps and a weed register recording weed species, location and abundance. AE has engaged specialist services to develop and deliver a feral animal management program for the Project. |
| 2.7 | Grazing must be limited to prevent grazing degradation of vegetation within all riparian zones. | Compliant | <ul style="list-style-type: none"> Rehabilitation activities within the easement continued around exposed tower batters and disturbed sites. Mulching has been utilised in these areas to ensure cover. Many of these areas have juvenile vegetation growth. |
| 2.8 | Fire management to prevent high intensity and frequent fires must be implemented. | Compliant | <ul style="list-style-type: none"> A bushfire management plan is in place for the Project which includes the preventative measures stated within the MMP. Bushfire hazard reduction burns (controlled burns) were undertaken within approved Offset Area. |
| 2.9 | A register of Squatter Pigeon sightings must be maintained and used to identify and inform all persons on site of areas that have a higher risk of vehicle collision and the need to be alert to risk of vehicle collision with Squatter Pigeon and drive slowly to prevent vehicle collision with Squatter Pigeon. | Compliant | <ul style="list-style-type: none"> Sightings of squatter pigeons are maintained within the fauna spotter catcher pre-clearance surveys and post clearance reporting (if sighted). Signage is installed at locations where sightings have occurred to inform site personnel of collision risk. |

5. DECLARATION OF ACCURACY

In making this declaration, I am aware that sections 490 and 491 of the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) make it an offence in certain circumstances to knowingly provide false or misleading information or documents. The offence is punishable on conviction by imprisonment or a fine, or both. I declare that all the information and documentation supporting this compliance report is true and correct in every particular. I am authorised to bind the approval holder to this declaration and that I have no knowledge of that authorisation being revoked at the time of making this declaration.
